

CATV Drop Amplifier HA-8640

Description

HA-8640 amplifier, 2-output(1 test port),forward path, 45-862MHz, transistor amplifying, gain 40dB, variable ATT(20dB) and EQ(18dB), output level 115dBuV, imperial F type female port, AC220V.

Key Feature

- ◎ High quality transistor amplifying
- ◎ 40dB gain, high output level and low non-linear.
- ◎ Variable attenuator(0~20dB) and equalizer(0~18dB) in forward path.
- ◎ 2 test ports in input and output.
- ◎ Compact aluminum housing.

Specification

Item	Unit	Specification
RF Parameter		
Frequency Range	MHz	45~862
RF amplify		Push-Pull hybrid
Gain	dB	40
ATT Range	dB	0~20
EQ Range	dB	0~18

Flatness	dB	+/-0.75
Frequency Response	dB	+/-0.75
Max. Output Level	dBuV	115
Noise Figure	dB	8
Input/output Test Point	dB	20+/-2
Return Loss	dB	12
Impedance	Ω	75
General		
Connector		F female, imperial
Power Supply	V	AC220
Power Consumption	W	8
Dimension	mm	240(L)*120(W)*55(H)
Weight	Kg	2.0

Application

© HFC network.
